Art Unit: 1734

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16, drawn to a first coating apparatus, classified in class 118, subclass 324.
- II. Claims 17-19, drawn to a second heating apparatus, classified in class 432, subclass 219.

The inventions are distinct, each from the other because of the following reasons:

The inventions of Group I and II are deemed independent and distinct inventions because the invention of Group I is to a coating apparatus combined with a moving conveyor and heater while the invention of Group II is to a heater combined with a support, the support not requiring a conveyor or even movement. The heater of Group II does not have to be used with a circuit board or even a coating apparatus but could be used to heat food products.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Thomas Sullivan on 9/12/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
